John, I have attached the engineering and exposure reports. These are the two we will reference when talking about the water releases during Manufacturing. I have attached the HH report and I need you to look at the Hazard statements and they will have to go into the SDS, The STOT should be listed as repeated dose and not just a single dose. Regarding PPE we need impervious gloves and an NIOSH respirator with an APF of 1000. We will be doing a water trigger of 3 ppb in the Consent Order since we can't mitigate all the eco risk. The SDS will also need a statement "toxic to aquatic organisms"

When you have a chance to look these over give me call and I can walk you thru them and we can determine the best way to move forward.

Jeff
